Department of Computer Engineering
CSE 101
Homework #3

Due date: 21.11.2018 – 09:00

Attached is a C source code which displays a menu to the user to perform some mathematical operations. Some of the options are not implemented and you are supposed to implement that empty options to obtain a complete program. Also an executable complete program is given you as a guidance. Your program should produce exactly the same outputs with the given program.

Submission: Submit your homework through moodle system as a C file named with your student number. Example: 123456789.c
Different file names will take your 5 points off.

Good luck,
